

FortiMates

Feature List & USP

- ✓ FortiMates verifies the origin of the sender through a QR code which displays the sender's identity to the receiver. The receiver can know the sender's details as long as he is a registered and verified user. This creates a legally binding obligation.
- ✓ FortiMates is a verified ID mailing system that validates the identity of sender of the email.
- ✓ Tackles fraudulent emails and make email trustworthy once again.
- ✓ Makes sure of sender's credentials as long as sender is a FortiMates client.
- ✓ FortiMates gives Automated and Secure Email Solution, Email Analytics – Prioritization, Extraction, and Auto-Answering with NLG.
- ✓ Support Team managing large number of emails is always challenging.
- ✓ Using ML/DL techniques emails can be segregated summarized, getting inference out of those emails.
- ✓ Significant opportunities of time & cost saving, increasing operational efficiency.
- ✓ Differentiate transactional and non-transactional emails.
- ✓ Create visual dashboard and metrics to get a snapshot view.
- ✓ Auto reply Templated emails using NLG capabilities.
